

# the BIRDS of VERMONT MUSEUM PROGRAMS for ADULTS

*All programs are 45 minutes. Additional programs available—please ask!*

## **See it. Sketch it. Bird it.**

Learn techniques for observing, describing, sketching, and identifying birds that will immediately help you become a better birder. We use life-like woodcarvings as well as observations of live birds. No prior drawing ability required.

## **Nature at Night**

Was that a bird? An insect? An amphibian? With photos and sounds we will follow the noises of nature through the year and into the night.

## **It's a Bird's Life**

Vermont's birds catch our notice during breeding season—but they lead interesting lives through the whole year. Learn physical characteristics, seasonal behaviors, and vocalizations, with carvings, visuals, touchable props, and bird literature; each species presented separately. All your favorites and then some—call to choose one bird or a series.

## **Which Warbler Where?**

Brush up on warbler identification by sight, sound, and habitat. We share a wide selection of life-size carved reproductions and audio guides to complement this presentation.

## **Winter Bird Feeding**

Vermont in Winter: cold, muddy, slushy, icy, snowy. But there are birds! Which ones? How come? What do they eat? How do they shelter? And how can you get involved with birds, birding, and conservation? All this and more in this presentation.

## **Guided Nature Walk**

Join us for a leisurely, guided nature walk on the Museum's grounds. Paths lead through garden, forest, and meadow habitats. Keep your senses open for birds, butterflies, flowers, and anything else that crosses our path. Trails are easy to moderate.

## **Citizen Science 101**

You don't have to be an expert to be part of scientific research. Learn to observe and report animals and plants you see, hear, or photograph. See how your data can be used by scientists to measure changes over time and space.

## **Cocoa, Coffee, Birds:**

### **a Conservation Conversation**

What's going on in coffee and chocolate habitats that affects birds? What can we do to help birds through our coffee and chocolate habits? This presentation is an introduction to a growing field of research and action. *New for 2018*
