

the BIRDS of VERMONT MUSEUM PROGRAMS for CHILDREN

Our STEAM and STEM programs are designed for homeschool, library, and Scout groups. All programs are 45 minutes. We provide materials. Call for cost and to schedule yours.

Beginning Bird Watching

Interested in birds? What do you look for? How do you know what it is? From super silly eyebrows to bellies and rumps, we will use museum carvings to show you some field marks and features used to describe and identify birds. We will also introduce life lists and show how everybody's observations help bird conservation.

Designed for ages 10 and older – limit 15

Egg-static!

Why do birds lay eggs? How do bird eggs compare and contrast with the eggs of other animals? Explore different conditions and challenges eggs must overcome. Discover adaptations that promote egg survival. Create your own egg and take it home.

Designed for 5-10 year olds – limit 12

Block and Bird

If you can draw a line, a circle, or a triangle, then you can draw a bird. This program takes young artists from simple shapes to loose sketches, looking closely at the basic shapes of birds. The bonus? Observing and drawing teaches a bit of bird biology at the same time.

For ages 6 and up – limit 10

Birds of a Feather

Feathers: unique and amazing! How do they help birds survive? How and why are they so colorful? How can birds fly? This program includes model-making, field work, and investigations into adaptations.

Designed for ages 8 and up – limit 15

Bird Crafts

What common household materials can we use to build a bird? Build a nest? Build a bird house? Build an entire diorama? We have a variety of craft ideas, and can plan the perfect activity for your group.

Designed for ages 6 and older – limit 10

the BIRDS of VERMONT MUSEUM PROGRAMS *for* CHILDREN

Soap Carving

Carve out a new hobby with a bar of soap, a popsicle stick tool, and inspiration from wooden bird carvings! Children learn to carve using one of our templates or their own design. Each child brings home their carving and one tool. Soap carving is easy to learn, yet offers challenges at all skill levels. (This can be messy and is best outside or in a well-ventilated room.)

Designed for ages 6+, adults welcome – limit 12

The Gnome's-Eye View

Get down on the forest floor and imagine the world from the height of a gnome, a mouse, or a junco. Explore the sounds, scents, and colors up close and tiny. Make a wee home for something! Are your neighbors beetles, spiders, shrews?

Designed for 5-10 year olds and fun for anyone feeling creative, flexible, and curious – limit 8

What to Eat with That Beak

Can you predict which foods work for a Spoonbill, a Crossbill, or a Curlew? What are beaks made of and how do they work? From short and stubby to quirkily curled, a bird's beak matches foods like berries, beetles, flies, and fish. Taste-testing not required.

Ideal for ages 5-10 – limit 10

Storytime in the Treehouse

Join us for stories read aloud. We choose from a variety of children's books suitable for your group's ages. This program is 30 minutes, and is ideal for story lovers of all ages.

Ideal for all ages—limit 12
